***Allowable Subject Matter***

1. Claims 1, 3-5, 7, 9-14, 19-28 and 59-60 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. With respect to independent claim 1, no prior art of record teaches

a plurality of CAM array blocks each including a plurality of rows of CAM cells, wherein each CAM array block has a unique hard priority indicative of the CAM array block's physical location relative to the other CAM array blocks, and has an arbitrarily assigned soft priority that is independent of the CAM array block's physical location relative to the other CAM array blocks; and

a priority resolution circuit configured to hierarchically resolve competing soft priorities between a plurality of active hit signals according to numeric significance so that a first of the plurality of active hit signals having a first soft priority will block resolution of a second of the plurality of active hit signals having a second soft priority when the first soft priority is higher than the second soft priority and vice versa when the second soft priority is higher than the first soft priority, and configured to resolve competing hard priorities between two or more of the plurality of active hit signals having equivalent highest soft priorities by identifying which of the two or more of the plurality of active hits signals has the highest hard priority.

4. With respect to independent claim 19, no prior art of record teaches:

a priority resolution circuit configured to resolve competing soft priorities between a plurality of active hit signals associated with a corresponding plurality of CAM array blocks, each having a plurality of rows of CAM cells, in order to identify two or more

active hit signals having highest equivalent soft priorities and further configured to resolve competing hard priorities between the two or more active hit signals in order to identify one as having the highest hard priority; and

wherein the priority resolution circuit is configured to resolve the competing soft priorities for all possible combinations of soft priority order between the plurality of active hit signals, wherein each hard priority is a unique value indicative of the corresponding CAM array block's physical location relative to the other CAM array blocks, and each soft priority is an arbitrarily assigned value that is independent of the corresponding CAM array block's physical location

5. With respect to independent claim 22, no prior art of record teaches:

a plurality of CAM array blocks each including a plurality of rows of CAM cells, wherein each CAM array block has a unique hard priority indicative of the CAM array block's physical location relative to the other CAM array blocks, and has an arbitrarily assigned soft priority, that is independent of the CAM array block's hard priority; and

means for identifying a highest priority one of said plurality of CAM array blocks having respective matching entries therein during a search operation, by evaluating the soft priorities of said plurality of CAM array blocks according to numeric significance so that matching entries in a first of said plurality of CAM array blocks are treated as having higher priority than matching entries in a second of said plurality of CAM array blocks when the soft priority of the first of said plurality of CAM array blocks is higher than the soft priority of the second of said plurality of CAM array blocks and vice versa when the soft priority of the second of said plurality of CAM array blocks is higher than the soft

priority of the first of said plurality of CAM array blocks; and means for identifying which of the matching CAM array blocks having the same soft priority has the higher hard priority.

6. Independent claim 23 is allowable for similar reasons as independent claim 19.
7. Independent claim 24 is allowable for similar reasons as independent claim 19.
8. The remaining pending claims depend from the above independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
